

Nature Care

Nature care is the best solution
To avoid the Earth pollution.
We mustn't cut the woods,
If we want to have the goods.
We should plant at least one tree,
If we want to set us free.
We mustn't inject the drains
Into the rivers' veins.
We should use trash bags,
And make containers with tags.
Every waste recycled can be,
But it should be tagged for everyone to see.
We should eat organic food,
If we want to be in a good mood.
It's important to save the nature
For every future generation!
